Testimonial

As a small business watching costs, we discovered that we were essentially throwing money out the window when it came to our refrigeration. Without the proper seals on our refrigerators and freezers we were making them work harder than they had to in order to keep up with the desired temperatures. That is of course until Commercial Gaskets of North Jersey happened to stumble across our little corner in Westwood. Kent came through and assessed the "damage" and quickly returned our aging equipment to its glory, saving us money and numerous headaches.

Kent has been there for us every step of the way. We always come up with new challenges for him and even if there isn't a "normal solution", he will find a way to fix it. Whether it is simple like changing out hinges on a freezer door or fabricating a new door for our ice machine, Kent can do it.

As a local business, we rely on local people to keep us going, and when it comes to gaskets, there is only one person we call.
